

ANIMAL *away*

Keep the hounds at bay!

Keep the dog out of the living room or raccoons away from your garbage. The state of the art Animal Away™ utilizes powerful high-pitched frequencies to deter animals from invading your space. Inaudible to humans, animals find this high-pitched frequency uncomfortable and move to a more peaceful neighborhood.

Other devices emit a constant sound, but Animal Away™ saves batteries by utilizing an infrared motion detector that activates the 23,000 Hz signal only when the unit detects motion within a 45-foot range. Use it indoor or outdoors. Wireless operation, powered by one 9-volt battery, allows the Animal Away™ to be optimally positioned to limit animal access. Easily mounts on walls, fences, or even wooden stakes and its green housing blends in with most lawns. Now you decide what areas are off limits.

- Inaudible To Humans
- Cordless Operation
- Infrared Motion Activation
- Mounts On Walls Or Fences
- Blends In With Landscapes
- Durable Green PVC Housing

Specifications:

Model:	P7810
Coverage:	Arc of 70 degrees, distance 45 ft
Audio Frequency:	23,000 Hz
Power Supply:	9V Battery
Weight:	6.35 oz
Dimensions:	4" x 2" x 1 1/2"

Specifications subject to change without notice.
