

# LED BUG TRAPPER II

*Attracts & Traps Mosquitoes & Flying Insects*

Tired of getting bit by mosquitoes or swatting away flying insects? Now with the LED Bug Trapper II you can trap and exterminate mosquitoes, black flies, biting midges, and flying insects with little hassle.

The LED Bug Trapper II utilizes a built-in UV LED light and a fan to trap and dehydrate flying insects in a quiet, efficient manner. The AUTO mode utilizes a built-in intelligent control system that will automatically turn on the device at dusk. The insects that are caught will be trapped in the collection container, which you can empty when necessary. The trap also has a specially designed funnel shaped screen that will keep the mosquitoes trapped inside even when the power is off.

The LED Bug Trapper II can be used indoors or outdoors and has three programmed modes which are OFF, AUTO, and ON. Use these modes to take control of how long power will be consumed! The LED Bug Trapper II will help you survive the summer months.

- Up to 50,000 hours of UV LED light and fan use
- Low power consumption
- Easy installation and maintenance
- No refills required
