

HOW TO OPERATE

1. Slide and remove battery lid. Install two CR2032 batteries matching correct (+) or (-) poles as shown. Slide lid back into place.
2. Switch unit on. Green light should appear on LED. If LED lights red, remove and replace batteries.
3. When a wireless camera is discovered, LED will flash green and audio alarm will sound.

NOTE

- Do not bend or attach key chains or other items to unit.
- This unit detects radio signals from wireless cameras only. **It cannot detect the presence of CCTV cameras or microphones.**
- Remove batteries when unit will not be used for extended periods of time.
- Avoid placing unit in extreme temperatures. Do not get wet or drop.
